BENCO'S NEW GOLDEN QUEEN RASPBERRY

A real novelty! A new sensational yellow Raspberry of the black Raspberry type. It is a chance seedling that is a cross between the red Raspberry and the black Raspberry. It is both a novelty shrub and a great fruit producer—the berry being of a rich golden color of medium size. Its flavor is entirely different from the red and black Raspberries. It is a blend between the red and black Raspberries. Just before the berry fully matures it is a rich yellow color, and when fully ripe reaches a rich golden yellow. It is truly a novelty shrub for your garden—a blend between the red and black Raspberries. After the first frost the canes will turn a rich yellow color, which is very outstanding during the winter months. The fruit can be eaten fresh or can also be successfully preserved; again they are very outstanding in a glass fruit jar, for the berries retain their rich golden color. Get some for your garden now!

NEW BLUE BERRIES

GROW YOUR OWN BLUEBERRIES—PICK THEM FRESH OFF THE BUSH
Cultivated Blueberries are hardy shrubs of rare beauty; they are doubly valuable because they are fruitful all year.

As a commercial proposition it is one of the most profitable fruits to grow. There is a big market. They make good money in a very short time, for you can begin picking the second or third season after planting.

Choose piece of ground easily supplied with moisture during dry summer months. It should not, however, at any time, become water-logged. Plant in full sun if possible; they will also do well in partial shade. Be sure the soil is acid. Give only shallow cultivation, not over 2 to 3 inches deep, so as to leave the roots undisturbed.

CONCORD—Bush of upright habit at maturity exceeding 6 feet in height. The berries are large.

JERSEY—Very large and vigorous in habit. The light blue berries are very large.
2-Yr., 12 to 18 in.
Each \$1.98 \$5.50 \$9.50 \$16.00
We recommend ordering both varieties so they will cross-pollinate and fruit freely.

EVERBEARING CYNTHIANA

An Ideal Arbor Grape—2 Year Vines

Each.....79c Dozen for.....\$7.88

This new Everbearing grape begins to ripen about the time the Concord does, and continues until frost. Has ripe grapes, green leaves and blooms on it all the time after they begin to get ripe until the growing season is ended by frost. The best red wine grape known. A very vigorous grower; for making grape arbors it is without equal. For high, dry countries it appears to be at home as well as on the creek and river bottoms. It does not require a rich soil, but prefers a dry soil of moderate fertility. It is so sweet it is almost too rich to eat out of hand. It has a higher content of sugar than any grape known. The berries are about the size of the Delaware, while the clusters are large; color is black covered with blue bloom.

Benco's Delicious CAGO GIANT Grape

A NEW RED GRAPE! Yields large bunches of immense gleaming grapes, deep rich red. A heavy producer. Larger, thicker skin, than Caco and bears heavier and hangs on later—until frost. Everbearing Fig

1 to 2 ft. 93c each

Ripens its fruit from July until frost and each tree will produce fruit first year. Bears on its new growth. Light straw to brown in color, medium size and very sweet. Does not crack early. Extra good for preserves or eating fresh.

Figs should be planted more extensively. Do not let the sprouts or suckers grow, but prune the trees so as to have clean bodies at least two feet high. Cut tops back to six or twelve inches above the ground when planting. Such trees will bear fruit and will stand much colder weather than if the sprouts are allowed to grow.

Golden Rain Tree

One of the rarest and most beautiful trees that bloom in spring with large showy yellow clusters. Plant in spot protected from winter winds.

3 to 4 ft., \$4.50

Every plant you order is guaranteed to start growth. We will replace free of charge any or all plants you buy that fail to start provided that you notify us of any of all plants that fail to start on or before MAY 1st after planting. We Cannot Accept Nursery Orders for Less Than \$2.00

Because of the heavy expense of packing and high rates on first pound by parcel post and express, we cannot fill orders for less than \$2.00.

Our One Objective

Is to furnish you with the very best that is to be had in all kinds of nursery stock, ornamentals, seeds and plants.

BEWARE OF FROST: Nursery stock received during frosty weather should be placed in a cool cellar or some such place and allowed to thaw out gradually. Don't handle plants until frost is out of them. Don't be in a hurry to open; stock can remain in this condition for several days if packages are covered to exclude air. The plants can then be unpacked for planting or be stored under proper conditions. There will be no damage to stock if handled properly when received.

PLEASE DO NOT ASK US TO CHANGE YOUR ORDER. We handle thousands of orders within a very short season, and it is impractical to locate individual orders for changes. We want to accommodate our customers but it is impossible to find any particular order quickly during the shipping season.
